

YARIN INBAR

FULL STACK DEVELOPER

PROFILE

A Full Stack Developer with a genuine hunger for learning, eager to join a friendly team and bring my self-taught skills and collaborative spirit. I'm independent, motivated, and excited about sharing and gaining knowledge with others.

WORK EXPERIENCE

I Optic 2019-Present

Chief Information Officer & Software Developer

Executive responsible of management and implementation of computer technologies.

- Strategic planning: Directed the tech evolution of a retail chain with 25 stores and an e-commerce website, guiding its expansion from a small to a medium-sized company.
- ERP implementation: Planned and executed the implementation of Priority ERP solutions, covering various aspects such as Inventory management, Accounting and POS.
- BI system development: Led to end-to-end development of a BI system on Qlik Sense platform, querying and integrating to the company's SQL database.
- In-House Software Development: Defined and developed applications to address unique company needs and automate existing work processes, including integration to external APIs and collaboration with business partners worldwide.
- Team Management and Training: Included technical writing and SOP implementation.

Live Retail 2022-Present

Full Stack Developer

Research and Development of a multi-channel application for retail chains.

- Full Stack Development: Java Spring Microservices and React architecture.
- Integration of third-party services: integrated Auth0, Priority ERP and Capacitor.JS.
- Database and Cloud Deployment: Managed SQL queries, Database server maintenance and deployed using Google Cloud Platform services.
- Cross Platform Development: Created iOS, Android, and Web versions.
- Large Scale Implementation: Successfully implemented the product for a major customer with 25 stores, showcasing adaptability and scalability.
